EDUCATION

National University of Computer and Emerging Sciences - FAST

Master of Science in Software Engineering

August 2024 – Present

Karachi, Pakistan

National University of Computer and Emerging Sciences - FAST

Bachelor of Science in Computer Science

August 2020 – June 2024

Karachi, Pakistan

EXPERIENCE

E Ocean Technologies

Software Engineer

August 2026 – Present

- Build and run **microservices** (**Spring Boot**, **Spring MVC**, **NestJS**) behind **Meta** business and customer engagement portals covering **WhatsApp**, **Instagram** and **Messenger**, integrating the Meta messaging APIs and webhooks.
- Building new **web chat and calling** features with **WebSockets** and **WebRTC**, and working on the Meta Business Platform APIs for messaging and calling over WebSockets.
- Built portal features in **Next.js** and **NestJS**, and added **Google SSO** for portal sign-in.
- Sped up busy endpoints with **MySQL** indexing and **Redis** caching, moved message delivery and retries onto **SQS** so traffic spikes no longer block requests, and fixed production issues across services.
- Work hands on with **AWS**: S3 for media, EC2 and RDS for services and data, SQS for queues, and **Lambda** for event-driven jobs such as processing webhook events off the main services.

Vaulsys (Vendor for NayaPay)

Software Engineer

November 2024 – August 2026

Karachi, Pakistan

- Designed and developed **RAAST P2M CSP and MSP Request-To-Pay** APIs to enable real-time digital payments between merchants and consumers.
- Built **Visa Scan N Pay** and **Visa Direct Remittance** APIs, enabling **cross-border payments** as well as **local QR-based payments**.
- Worked on card-based transaction APIs covering **e-commerce (online) transactions**, **POS transactions**, as well as international transactions via **Euronet** and domestic transactions through **1Link**.
- Led the development and maintenance of core systems including switch, wallet, and its underlying non-financial APIs.

Logiciel Services, LLC

Junior Software Engineer

June 2024 – October 2024

Karachi, Pakistan

- Gained hands-on experience in developing and maintaining a production-level feed server application for stock trading data.
- Collaborated in the migration of the backend architecture, implementing new data structures to handle latency and race condition.
- Code Documentation: Authored comprehensive documentation for new features and system modifications, ensuring clarity and ease of understanding for future developers.

Syslab.AI

Full Stack Developer Intern

January 2024 – April 2024

Karachi, Pakistan

- Frontend: Designed React pages and components from figma templates and worked on the responsiveness, API integration & Role Based Routing of the application.
- Backend: Implemented the Captcha Functionality on server-side which was earlier handled in the browser.

TECH STACK

Frontend: ReactJS • Next.js • Tailwind

Backend: Spring Boot • Spring MVC • NestJS • NodeJS • .NET

DataBase: PostgreSQL • Oracle • MongoDB • MySQL • Redis

Cloud and Auth: AWS (S3, EC2, RDS, SQS, Lambda) • Google SSO

Realtime: WebSockets • WebRTC

Languages: Java • JavaScript • C/C++ • C#

PROJECTS

GigPilot | *Freelance Marketplace Platform*

- A full-stack freelance marketplace connecting employers and freelancers with features like profile management, job posting, bidding, and secure task workflows.
- Backend built with **Java**, **Spring Boot**, and **RESTful APIs** for scalable service integration. Implemented JWT-based authentication, role-based access control, and modularized controllers.
- Frontend built with **ReactJS** and **Tailwind CSS**, featuring dynamic components, protected routes, and responsive UI design.
- Database: Designed normalized schemas using **MySQL** and performed secure data operations with query builders and stored procedures.

Social Media Website

- Features:** Like/DisLike, Follow/UnFollow, Upload Posts, Videos and Pictures
- Frontend is built using create-react-app. Used **Material-UI** for styling, **axios** for making requests to the backend and used **react-router-dom's HashRouter** for routing.
- Backend is built using express.js for setting up middlewares and routes, Used mongoose for database operations.
